

## PROFESSIONAL PROJECT SERVICES Workforce Mobile Devices

ScanOnline's Professional Services Team can configure your mobile devices to your organization's networks, applications, and business systems, while customizing their functions around your team's specific workflows and industry. Our StageMobile solutions for device launches maximize the efficiency of the devices workforces rely on and in turn improve operations.

Included in our capabilities is establishing a mobile device management (MDM) platform to help admins track current device activity, manage device security, and receive critical real-time device status notifications.

### StageMobile

- » In-House Applications/Software Loading & Licensing
- » Device-to-Wireless Network Set Up
- » Barcode Symbology Configuration
- » Security Protocol Configuration
- » Wireless Carrier Activations
- » Asset Tagging + Configuration Logging

### StageMobile MDM

- » Mobile Device Management Software Loading & Licensing
- » Device-to-Wireless Network Setup
- » Security Protocol Configuration
- » Administrative Training

### StageMobile Plus (Project Roll Out)

Want to go live with multiple devices across a number of worksites?

ScanOnline is fully capable to ready all of your devices to deploy based on your schedule, within your specific order of sites to convert, all at the time of your choosing.
